

Sugar Candy Syrup:

Easily absorbable vegetable sugars, an ideal blend of various carbohydrates that provide the trace elements needed to create large compact and resinous flower clusters. Sugar Candy Syrup provides amino acids that allow plants to form adequate proteins for proper absorption of nutrients, stimulates and enriches the substrate. Together with BAC stimulators it creates the perfect symbiosis for the proper development of beneficial bacteria and fungi.

Sugar Candy Syrup is the ideal solution for those growers who want to obtain an unmistakable taste and aroma in addition to high production.

Dosage:

Spray (Anti-stress) Add 5 ml for every liter of water.

Irrigation:

Add 10 ml for every 10 liters of water. Use with every watering.

Benefits of BAC Sugar Candy Syrup:

- Better flower development
- Larger flowers
- Suitable in periods of stress
